

## Editorial Commentary

On behalf of the Editorial Board I am delighted to bring to our esteemed readers and the global academic community, issue 2, volume 1 of the FUTO Journal Series Publication.

We remain grateful to our scientific and academic community for appreciating the quality of our review process and publication. This is evidenced by the quantum of manuscripts received. We have also progressed from the initial 12 articles in our maiden issue to 30 articles in this current issue.

Due to the numerous submission received, we shall accelerate our review time and also split our series into the various fields of research such as Agriculture, Engineering, Health and Empowerment, Science, Innovation and Technology. However to maintain high quality in publication, strict adherence to our set objectives and criteria for acceptance will be maintained. We also attach importance to limitations on the journal pages for each article. These will also allow for selection of the most original and important contributions to academic and research findings.

We have engaged young academics into our editorial board as reviewers to further strength and invigorate our service delivery. Interested academics who have the motivation are encouraged to indicate their interest to the board.

Once again, we assure authors of rigorous and blind review processes in all our future issues and volumes.

Thanks you.

**G.N Onuoha**
